

Press Release – May, 2006

New Sensors and Options from Eagle Tree Systems, LLC

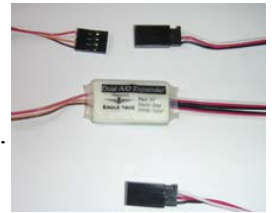

Eagle Tree Systems is pleased to announce the availability of several new Sensors and Options for our Seagull Wireless Telemetry and Data Recorder products.

Dual Channel Analog to Digital Input Expander

Now it's easy to add your own analog sensors to our systems! The expander adds two channels of high resolution Analog to Digital to the System, with up to 15 bit resolution.

See compatibility note below.

[Click Here for more information on the Dual A/D Expander.](#)

300 Amp Electric Expander

Have a high current application that needs measuring? Our new 300 amp Electric Expander measures current up to 300 amps, as well as voltage to 50V!

[Click Here for more information on the 300 Amp Electric Expander.](#)

We now also provide support for two Electric Expanders used simultaneously!

Thermocouple Expander with CHT Probe Kit

Now you can measure Cylinder Head Temperature via a ring probe mounted under your plug. Our Thermocouple Expander supports two two probes. Includes CHT probe kit for use with OS #8 and 10mm plugs. Additional EGT and CHT probes also available separately.

Wireless Dashboard SMA Antenna Upgrade

Replaces the standard integrated stainless wire antenna with an SMA jack and removable rubber Antenna. Great for connecting your own antenna, such as a Yagi, to the Wireless Dashboard receiver. Requires return of Dashboard to Eagle Tree, if not purchased with new system.

Pro Flight Recorder Memory Upgrade

Have some really long flights that need recording with our Pro system? New memory upgrade doubles the Seagull Pro Flight System/Pro Recorder onboard logging memory. Requires return of Pro Recorder to Eagle Tree, if not purchased with new system.

Availability: The above Sensors and Options will soon be available from our [extensive international dealer network](#). Support your Eagle Tree Dealer! If there is not a dealer near you, order from our website, in the "Accessories" section of each of the main product groups.

NOTE: The Dual A/D Expander requires 4.XX is required for Flight, Car or Boat Seagull/Recorder owners. A hardware upgrade is necessary for Recorders shipped before approximately December of 2005. We apologize for the inconvenience. [Click here](#) for information on upgrading.
