

Press Release – November, 2006

## Google Earth™ GPS Support from Eagle Tree Systems, LLC

Eagle Tree Systems, LLC is excited to announce Google Earth™ live and recorded data support with any of our GPS equipped Recorder and Seagull Telemetry systems.

Unleash the power of our data systems with the powerful visualization capabilities of Google Earth™! Our software now supports live data feed to Google Earth, as well as exporting of recorded data to the Google Earth format.

To use Google Earth™ with you Eagle Tree GPS data, simply download our latest Windows application from the support page of our website, and install Google Earth™ from <http://earth.google.com/> (it's free). Then, a few clicks are all it takes to utilize all the power and features of Google Earth™ to track and analyze your systems like never before.

Of course, our built-in live and recorded GPS graphing support is still available to compliment Google Earth™ visualization features.

If you do not yet have one of our low cost, feature packed systems, see your dealer or our website for more information.

Visit our site at <http://www.eagletreesystems.com> or email [sales@eagletreesystems.com](mailto:sales@eagletreesystems.com) for more information.
