

Press Release – December, 2006

Brushless Motor RPM Sensor from Eagle Tree Systems, LLC

Eagle Tree Systems is pleased to announce our innovative new Brushless Electric Motor RPM Sensor/Tachometer. Our Brushless RPM sensor makes it extremely easy to measure RPM.

To measure RPM on your brushless electric Plane, Heli, Car or Boat, just tap one wire from our tiny new sensor into one motor lead, enter motor parameters in our software, and you are ready to go!

The Brushless RPM Sensor is compatible with our MicroPower, PowerPanel, Seagull and Data Recorder products, and will be shipping to our dealers and customers on approximately **December 14, 2006** (just in time for Christmas)! Preorder yours today!

See your Dealer, visit our site at <http://www.eagletreesystems.com> or email sales@eagletreesystems.com for more information.

Note: Using the Brushless RPM Sensor with our Seagull and Data Recorder products requires firmware level 4.XX or higher, which has been shipping since approximately August, 2005. [Click Here for Upgrade Info \(PDF\)](#).
